

PSI CASING SPACERS & END SEALS

Canadian Stocking Distributor for Pipeline Seal and Insulator Inc: (PSI) **Power Plant Supply Co**

<http://www.powerplantsupplyco.com> Toronto, ON: 416 752 3339 Dartmouth, NS: 902 435 9899 St John's, NL: 709 747 7650

PSI casing spacers and casing insulators, are precisely sized to hold carrier pipes in the specified position. Corrosion resistant PSI steel or stainless casing spacers provide the best available isolating protection. (PE and Ranger II casing spacers are non-metallic)

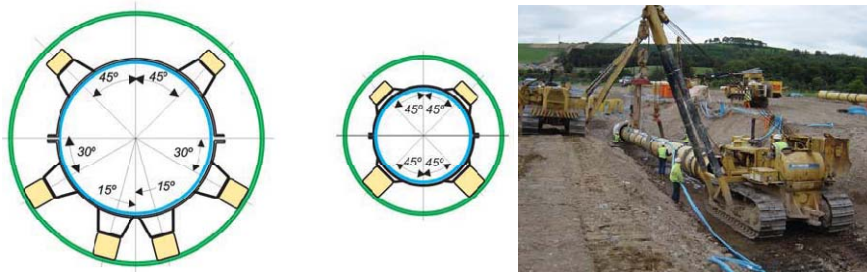

Energy pipelines, waterworks and sewer piping systems demand a tough and durable casing spacer, Pipeline Seal and Insulator Inc have years of experience manufacturing components to meet these demanding requirements.

Special install tools are *not required for PSI casing spacers*; they easily bolted together, saving labor cost. When using PSI Casing Spacers, extra filling of the casing annulus space is not a requirement.

PSI has a casing spacer for any pipeline project. They are especially suited for river crossing, canal crossing and bridge crossing points, as well as highway and railroad crossings. For separation of water lines and sewer piping, requiring containment, PSI casing spacers combined with Link Seal end seals is the solution for double wall carrier/casing combinations.

PSI casing spacers are manufactured in Stainless steel, coated steel or HDPE. Call us for any single or multiple carrier / casing combination. Contact Power Plant Supply Co; we will be happy to assist with sizing and model selection. <mailto:atlantic@powerplantsupplyco.com>, or phone one of our locations.

PSI casing spacers are always the RIGHT CHOICE, proven tough for all application. Visit <http://www.powerplantsupplyco.com>
