<mailto:sales@powerplantsupplyco.com>

In oil producing and petrochemical industry pipelines very often fail because of clogs, narrowing of flow area and high viscosity of delivered liquids. Heated wrap around pipe sleeves may be used in any environment to help alleviate the problem. Certified to UL/CSA safety standards Heated wrap around pipeline sleeves are designed for use with all types of pipelines: metal and plastic. The system provides freeze protection for pipes with hot and cold water. Pipe Wraps are light-weight and easy to install over pipes, manifolds, pumps, hoses and other cold-sensitive equipment.

The wraps are equipped with adjustable straps that ensure a secure fit to maximize heating performance. Heat trace, heat-spreading carbon fiber technology, with an insulation barrier and an outer vinyl shell allows for fast and simple installation

4-8 inch Pipe: available in 5 to 20 ft length; **10-12 inch Pipe:** available in 5 to 10 ft length

Heated Insulated Concrete Curing Blankets: <http://powercanadaprotect.com/cureblanket.html>
